CPL
CHEMISTRY AND PHYSICS OF LIPIDS

Volume contents

Volume 96 (1998)

Foreword 1

H.H. Mantsch (Canada) *Vibrational spectroscopy of lipids: a historical perspective* 3
R.N.A.H. Lewis, R.N. McElhaney (Canada) *The structure and organization of phospholipid bilayers as revealed by infrared spectroscopy* 9
K. Brandenburg, U. Seydel (Germany) *Infrared spectroscopy of glycolipids* 23
J.C. Gómez-Fernández, J. Villalaín (Spain) *The use of FT-IR for quantitative studies of the apparent pK_a of lipid carboxyl groups and the dehydration degree of the phosphate group of phospholipids* 41
J.L.R. Arrondo, F.M. Goñi (Spain) *Infrared studies of protein-induced perturbation of lipids in lipoproteins and membranes* 53
L. Silvestro, P.H. Axelsen (USA) *Infrared spectroscopy of supported lipid monolayer, bilayer, and multibilayer membranes* 69
D.D. Baldyga, R.A. Dluhy (USA) *On the use of deuterated phospholipids for infrared spectroscopic studies of monomolecular films: a thermodynamic analysis of single and binary component phospholipid monolayers* 81
W. Hübner, A. Blume (Germany) *Interactions at the lipid–water interface* 99
A. Dicko, H. Bourque, M. Pézolet (Canada) *Study by infrared spectroscopy of the conformation of dipalmitoylphosphatidylglycerol monolayers at the air–water interface and transferred on solid substrates* 125
R. Mendelsohn, D.J. Moore (USA) *Vibrational spectroscopic studies of lipid domains in biomembranes and model systems* 141
